40 Mbps on an 80 Mbps connection? - [Solved]

2019/07/11

So my broadband provider just bumped my bandwidth from 40 Mbps to 80 Mbps and even though I can see the difference if I connect the cable directly to my PC but over WiFi, the download speed isn't crossing 40-42 mbpsI contacted my ISP and they said that it's normal over WiFiI am using TP Link TL-WR740N router. Is there a way I could get the full or an increased bandwidth over WiFi as well? Maybe with a different router?Kindly adviseThanks
