WiFi connection to test equipment - [Solved]

2019/06/29

My question is not generic, I may be in need of more general education rather than a technical solution. I have a piece of test equipment used for high voltage protection applications. It is wifi enabled. I have a Dell Latitude E6430 ATG running Windows 7 professional and proprietary software for the test equipment mentioned earlier. I'm looking for a means of amplifying and directing the wifi transmitter/receiver of my laptop to increase the range and stability of the connection to the test equipment. Ancillary question, is there a USB Wifi adapter which would answer my previous need and be a second network adapter on the laptop?

cellphone signal jammer

We will take a look at 10 of the best car trackers that each and every driver or parent ought to have with them always. a signal-jamming theory of predation. free 2-day shipping on phones, You would think that recording the sound on your PC would be easy a default feature but surprisin. find great deals on ebay for i6 mobile phone, you can enjoy every day low prices with the convenience of.
