Router advice for 100 Mbit

2019/07/17

I need advice on which router to use for a 100 Mbit connection. I own a ASUS RT-N66U that I've been using for a three bedroom apartment on a 50 Mbit connection and I'm very pleased with it but I'm not sure it'll be sufficient for my new house with 100 Mbit. The house is one story and 134 square meters. If the RT-N66U isn't good enough any more could you recommend a router around \$100? Thanks
