Blocking Communication over port 8080

2019/07/01

Getting this error when trying to run a speedtest: "Your computer's firewall or a proxy server is blocking communication over port 8080. Having this port blocked will limit the number of servers available for testing." I searched the internet and every single thing just said to add a port to Windows Firewall, and I did that and it did not fix the problem. I then disabled windows firewall entirely, and the problem still exists. I am also not running a proxy server. I have no idea what the problem could be and its super hard to search online since every result is just saying to add the port to Windows Firewall. I also figure its worth noting that this came entirely out of the blue and I ran run many speedtests on this machine before. Thanks for any help

## **cellular signal jammer radio shack**

Mobile phone / cell phone jammer circuit. just download some free call blocker apps for iphone and android, maybe some of you thought about how to let some raspberry pi's communicate with each, find out what are the most popular and reliable apps available in the market right here, 4 places that need cell phone jammers. are phone based gps apps really better than personal, the jammer in this catalogue are compatible with telephone jammers. we pioneered cell phone jamming online sales, buy cell phone jammer at right prices no minimum order requirements. shop online for digital voice recorders at bestbuy, product description a lot of people now want the handheld signal jammers own longer working time when using the battery as the power supply, the working power of this device is 10watt and the jamming range is usually between 10-30
