How to add my voice live over the Windows 10 system sound? - [Solved] 2019/07/06

Later edit:I misplaced this message, I should've added it to Windows...----Hi.I'd like to connect a bluetooth phone headset (e.g. Jabra Storm) to my PC through a bluetooth 2.0 USB dongle to continuously listen to all system sounds (error sounds, notifications, online radio etc.).... I suppose I can do that, right? I need to have all the system audio right in my ear, without the need for monitor speakers, or any other speakers. But I also need to overlay my voice / add my voice over the system's audio.So, I'd like to be able to speak into a microphone connected to the PC, and hear myself in the headset through the same bluetooth connection together with all the whatever other system sounds there are (notifications, playing music etc.).How can I do that?

no cell phone signal
