Cheap Router as Wireless Repeater? - [Solved]
2019/07/07

Hello I am looking for a solution to extend my house's wifi into my girlfriend's house across the street which has no Internet Subscription. Currently, you can get Wifi on her room, but obviously it's a weak signal. In order to improve the signal I want to add a Cheap Router in Her house, close to the window, to act as a Wireless Repeater. My home router works at 2.4ghz bands. Would this be a decent/cheap solution to at least have a better coverage on her room? If so, which router should I get or what should I look for? Thanks in advance.
