Modem SB6141 keeps resetting with T3 and T4 errors  
2019/07/07

I recently moved into an apartment and had internet installed by Atlantic Broadband....the only provider for this area. They original installed their own modem/router combo which was beyond garbage. The wifi connection would significantly weaken and then drop when you walked away from the router in the same room. I ended up purchasing my own modem, the SB6141 and an accompanying Netgear router the same day but the modem keeps resetting and in the logs, I see a bunch of T3 and T4 errors. It's quite annoying that this keeps happening. I posted screenshots of the log page and signal page from the modem UI.I know I should call my ISP but from previously working with them and just knowledge of how they work, they're useless when it comes to trying to get them to do something. They tend to point the finger at the customer as it's there fault and with me owning my own modem and not renting their's, there's a good chance that they're going to tell me it's my modem and I need to rent one of theirs to fix this issue.I'm hoping someone here can give me a few words of knowledge of what to say to the rep to tell them someone needs to come out and diagnose my signal. I really believe it's the signal because of some searches pointed to that from the errors I'm receiving.<https://ibb.co/gXkG8T><https://ibb.co/dn8Q2o>
