Outdoor wireless bridge question - what channels? - [Solved]
2019/07/01

Good day Folks! I need a good advice here. Two buildings are going to communicate to each other with high directional dish antennas (Outdoor Long-Range 11ac Access Point/Wireless Bridge). Each antenna has a bandwidth of 867Mbps. I need to get a throughput of 2Gbps in both directions. Three antennas on each building give 2.6Gbps. I decided that there will be channel bonding - 80Mhz wide channels. In this case I can have 6 non-overlapping channels (lets assume it is DFS negotiated). ch 36-48 (-----) ch 52-64 ch 100-112 (-----) ch 116-128 ch 132-144 (-----) ch 149 - 161 Why I am doing this? Well, to avoid co-channel interference. I just assume that in this case I can achieve a throughput of 2Gbps, giving that each antenna is actually MU-MIMO (if this even possible in a Bridge mode with highly directional antennas). Correct me if I'm completely wrong here... Thank you

portable cell phone signal jammer

And the jamming range of this 315mhz 433mhz car remote control jammer is also powerful. I am always on the hunt for the newest and greatest apps and gps application/services are no exception.
