Custom PC Miracast? - [Solved]

2019/07/30

Hey all, I built a custom PC using an AMD A10-5800k APU. I read that this is capable of doing miracast. What I did not realize was that I required a wireless networking card that could support WiFi Direct. I have been trying to research wifi cards with wifi direct and how to make it work, but it seems like there is not a lot of information for getting miracast working on a custom pc. Does anyone know how to get this working? or of a wifi card that would work for this? Thanks in advanced!
