PC switching between access points on a mesh network - [Solved]

2019/07/30

So I have a new WiFi system that is really good: the TP-Link Deco m5 whole home WiFi system. I attempted to play some games and it was unplayable. I asked the networking 'expert' of the house what was happening and he came to the conclusion that my PC was switching between access points rather than locking to one with the best connection. Is there any way to force my PC onto one access point? The QoS is a proprietary system for the Deco m5

stop cell phone signal blocker
